

Footwear Foot Sizing Chart

Before you start –

Is this page printed correctly?

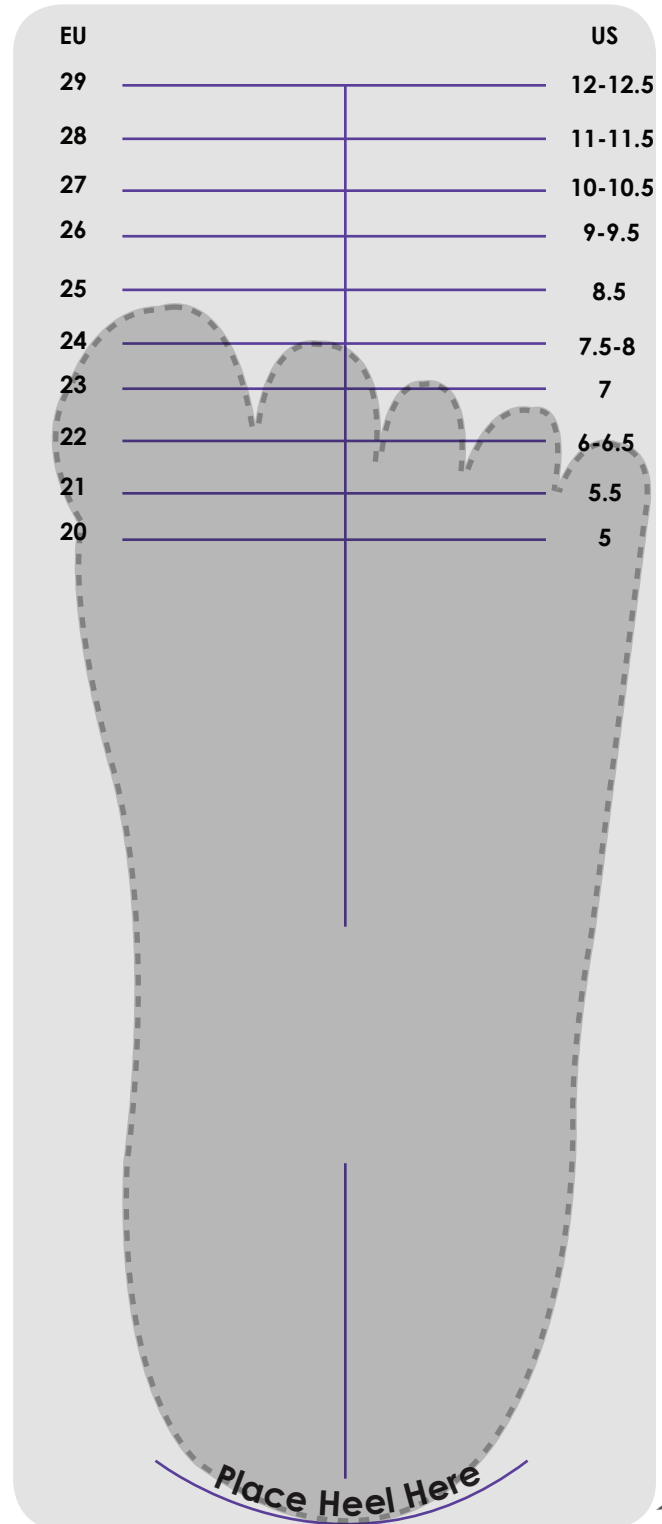

Check your printer options and make sure that page scaling is set to "none" or "no scaling"

5 Easy steps to find your child's size:

1. Cut along the dotted line.
2. Place the sizing chart on the floor with a flat surface against the wall.
3. Place the child's foot on the chart, heel against the wall. The child should be standing, foot as straight as possible.
4. Draw a line in front of the child's longest toe. Repeat for the other foot (measure both feet for accuracy.)
5. Look for the nearest size that allows 1/8" to 1/3" of extra space for your child's foot.

Match your ruler here with ours to ensure accuracy. Line should = 9 inches.

Cut Along Line

Place chart against a wall with heel marker touching wall.
